

T.R.Fabrications Ltd

QUALITY POLICY

TR Fabrications produce high quality medium to heavy steel fabrications and metal developments to customer specifications and designs with the ability to handle up to 20 tonne capacity single piece items.

We are committed to providing an excellent service to our Customers, meeting all agreed requirements including applicable legislation, regulations and codes of practice.

To support our aim to achieve consistent customer satisfaction we have established a Quality Management System that meets the requirements of ISO 9001:2015 and BS EN 1090 part 1 & 2. Our Quality Management System provides a framework for managing operational procedures and minimising risk. Clear quality objectives and targets support our continual improvement approach in order to enhance our customers' experience.

We review our performance against these quality objectives and targets at Management Review meetings and ensure the continuing suitability of our Quality Management System processes.

We recognise that our most important asset is our people and we ensure they have the training and development necessary to deliver an efficient and effective service to our customers.

This policy is communicated to all employees and is made available to customers and interested parties through our website on request.

Signed P Richardson
